Budgam, J and K

Summary

As a B-Tech student, I have developed competent programming skills and a foundational understanding of machine learning. Additionally, I have gained valuable experience in Android development. With a keen interest in technology and a drive for innovation, I am eager to further enhance my skills and contribute effectively to projects in the software development and machine learning domains.

Skills

- Android Development
 - Coding in C, Java and Python
 - Machine Learning with Python
 - Front-End Development
-
